TITLE: Design and production of print advertising and commercial display materials over the Internet

## DEPR:

FIG. 3 in particular shows an introductory screen 69 in which the client signs on by giving his or her username 70, group password at 72 and user password 74. The client has several options he or she can take: searching for shells, templates and images, by clicking on button 76 with a mouse; browsing through retrieved shells, templates and images, by clicking on button 78; placing retrieved images in a "shopping cart" for purchase, by clicking on button 80; completing the image retrieval transaction by clicking on checkout button 82; or going into a tutorial by activating button 84. The introductory screen 69 also includes links to pages on news, help, contacts, registration, and the web site index at 86. The "sign up" icon 88 is also a link, and brings up a new user request page 90 (FIG. 4) by which certain client data are entered, including shipping information of requested images.

File: USPT

Oct 31, 2000

DOCUMENT-IDENTIFIER: US 6141006 A

TITLE: Methods for executing commercial transactions in a network system using visual link objects

## DEPR:

It will also be noted that the use of a "shopping cart" repository to retain the VLOs 10 representing the goods that have been chosen for actual purchase allows the buyer to group together items for purchase from the same supplier, and that the buyer's system is provided, from the VLOs 10, with all of the information, such as shipping and handling charges and taxes, to compute the total cost of each transaction. This ability thereby allows the buyer to make purchasing decisions based on the total cost of the transaction and to make adjustments and decisions as necessary.

L2: Entry 1 of 37

File: USPT

Mar 6, 2001

DOCUMENT-IDENTIFIER: US 6199079 B1

TITLE: Method and system for automatically filling forms in an integrated network based transaction environment

## BSPR:

Using the search methods described in U.S. Pat. No. 5,826,258, the user can find the best price for any item available from many vendors. The user is able to seamlessly query multiple different vendor data to make a decision, simplifying the decision process. However, purchasing the items still requires that the user interact with multiple web site "shopping carts," and fill in the required information multiple times. For example, the user must give her name, address, credit card number and click the "Buy it" button for each of the vendors and deal with their order entry forms.

## DEPR:

In conclusion the present invention provides for a method of automatically filling in forms in conducting transactions with multiple vendor sites using a common interface. An advantage of the present invention is that there is a single point of user profile information for submission. A further advantage of the present invention is that it enables the user to buy a collection of items by a given date at the minimum cost, including tax and shipping charges. A yet further advantage of the present invention is that it employs a single point to check out instead of multiple points thus saving time and money for everyone concerned.
